EDUCATION

Rajiv Gandhi University of Knowledge Technologies – RK Valley <i>Bachelor of Technology in Computer Science</i>	2024 – 2028 CGPA: 8.75
Rajiv Gandhi University of Knowledge Technologies – RK Valley <i>Pre-University Course (MPC)</i>	2022 – 2024 CGPA: 9.04

EXPERIENCE

Bloomer <i>Full Stack Developer</i>	2025 – Present <i>Live — GitHub</i>
– Developing a video-first e-commerce platform (coming soon) using Node.js, Express.js, React.js, and Firestore. – Designing scalable backend APIs and real-time data handling systems. – Building interactive UI for seamless watch, swipe, and shop experience. – Contributing to a next-generation shopping platform focused on creator-driven commerce.	

PROJECTS

PaperVault – RGUKT Question Paper Repository <i>Full Stack Web Application</i>	Live — GitHub
– Built a platform for RGUKT students to access and manage question papers across campuses. – Implemented advanced search and filtering by course, campus, exam type, and year. – Developed secure authentication using JWT with bookmarks and download tracking. – Created admin dashboard for uploads, user management, and analytics. – Tech Stack: Node.js, Express.js, MySQL, Sequelize, HTML, CSS, JavaScript.	
Kids Hobbies Prediction System <i>Machine Learning Web Application</i>	GitHub
– Developed ML system to predict hobbies for children (5–12) using Random Forest. – Built 13-parameter prediction model with multi-algorithm comparison. – Implemented JWT authentication with prediction history and feedback system. – Created admin dashboard with ML performance visualizations. – Tech Stack: React, Django, DRF, scikit-learn, SQLite.	
Medha AI – RGUKT Campus Assistant <i>AI-Powered Web Application</i>	Live — GitHub
– Built multilingual AI assistant using Gemini API for real-time campus queries. – Implemented voice interaction, image analysis, and multilingual support. – Developed modules for academics, campus services, and administrative guidance. – Designed complaint system with tracking and priority handling. – Implemented role-based authentication for students and admins.	

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, SQL, HTML/CSS
Frameworks: React, Node.js, Express.js, Django, Django REST Framework
Tools: Git, GitHub, VS Code, Vercel, Render
Technologies: Firebase, Firestore, MySQL, SQLite, REST APIs, JWT Authentication

EXTRACURRICULAR ACTIVITIES

Sports: Regularly play badminton and cricket, demonstrating teamwork, coordination, and competitive spirit.
Problem Solving: Enjoy solving Sudoku puzzles, enhancing logical thinking and analytical skills.
Interests: Listening to music, helping improve focus and relaxation.
